EDUCATION

SRMCEM

BTech in Computer Science and Engineering - CGPA - 7.61

Govt. Polytechnic Bijnor

Diploma in Computer Science and Engineering - Percentage - 74

Lucknow, UP

2021 - 2024

Bijnor, UP

2017 - 2020

TECHNICAL SKILLS

Programming Languages: JavaScript, Java

Libraries and Tools: Nodejs, React, React Hooks, Redux, Git, DBMS, SQL, RestfullAPIs, Data Structures and Algorithms, SDLC

Front-end Techs: HTML, CSS, Bootstrap, JavaScript

WORK EXPERIENCE

Data Analyst Intern

Cognifyz Technology, Remote

June 2024 - August 2024

- I have worked as a Data Analyst Intern, where my responsibilities include analyzing data using Python and Excel to generate clear, actionable insights for clients. Additionally, I have developed interactive dashboards utilizing Microsoft Power BI.
- I have also enhanced my soft skills through my experience as a Data Analyst Intern.

Web Developer Intern

Techgyan Technology, Remote

June 2023 - August 2023

- Build a login-signup API that accepts data from the front-end, validates the user, and then stores the data into the database. • Utilized MySQL database, Node.js Passport Authentication for security, and HTML/CSS for the front-end.
- I enhanced my communication skills through regular interactions with my trainer to discuss work and project details.

Web Developer

Avology Technology, Mohali, Punjab

Feb 2020 - Oct 2020

- Worked as a PHP developer and gained experience in both WordPress development and core PHP.
- My role involves creating dynamically designed websites, uploading them onto WordPress using custom themes, and developing custom WordPress plugins.
- Having this as my first office job, I gained valuable insights into workplace culture and the importance of effective communication.

PROJECTS

- **Social Media App - (Tech Stack: React, Redux, JavaScript, Node.js, Express,)**, It typically includes features like user authentication, profiles, posts, likes and tags etc. Users can create, edit, and delete posts, interact with others's content. It's a hands-on project for learning React concepts such as state management, component lifecycle, and API integration. [Try it!](#)
- **E-Commerce site (Tech Stack: React, Redux, JavaScript, Firebase, Bootstrap)**, Key features include product browsing, search functionality, filtering, user registration/login, a shopping cart, order processing, and payment integration. [GitHub](#)
- **Chat Application - (Tech Stack: JavaScript, Node.js, Socket.IO, HTML, CSS)**, This web application facilitates communication among users through messaging, voice calling, and video calling features. It also includes support for message broadcasting. [GitHub](#)

COURSEWORK

- Currently undergoing Java full-stack training at Jspider.
- Completed a Web Development Bootcamp on Udemy.
- Completed React and Redux training on Udemy.
- Completed Data Structures and Algorithms using course on Udemy.

ACHIEVEMENTS

- Successfully solved over 350+ problems on LeetCode.
- Earned 8 monthly badges and 2 competition medals on LeetCode.
- Successfully completed the HTML and JavaScript assessment on LinkedIn.
